

PROFILE

Final-year **AI & Data Science** engineering student building data platforms end to end: **real-time CDC and streaming pipelines** (Debezium, Kafka, Spark, ClickHouse), dashboards and **agentic AI applications**. Shipped a production web platform for a real client and a CI/CD pipeline as a DevOps intern. Open to internship and junior data / AI engineering roles.

SKILLS

|                |                                                                                                                                                 |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Data & AI      | Python, SQL / NoSQL / PostgreSQL, Apache Spark (PySpark), Apache Kafka, Debezium CDC, ClickHouse, Pandas, LangChain, Ollama, FastAPI, Streamlit |
| Backend & Web  | Java, Spring Boot, Angular, Express.js, React, JavaScript / TypeScript, Tailwind CSS, Flutter / Dart, C / C++                                   |
| DevOps & Cloud | Docker, Docker Compose, Kubernetes, Jenkins, GitLab CI, DevSecOps, AWS, Linux, Git / GitHub                                                     |

EXPERIENCE

|                                                                                                                                                                                                                                                                     |             |
