

FEDI AFLI

Computer Science Engineering Student

f3diafli@gmail.com · +216 29 337 633 · Bizerte, Tunisia · github.com/fedi-afli

SUMMARY

Computer Science Engineering student (23) with a strong foundation in full-stack web development, DevOps, mobile development, and AI-driven applications. Delivered a complete client web platform independently (concept to production), plus two professional internships spanning DevOps and full-stack e-commerce. Builder of a diverse project portfolio spanning agentic AI, security intelligence, e-commerce, social platforms, and system utilities. Passionate about clean architecture, automation, and building solutions with real-world impact.

SKILLS & TECHNOLOGIES

Web Development: React, Angular, Spring Boot, Express.js, Tailwind CSS / Bootstrap

DevOps & Cloud: Docker, Kubernetes, CI/CD (Jenkins, GitLab CI), DevSecOps

AI & Data Engineering: Python, SQL / NoSQL / PostgreSQL, Data Structures, Algorithms, LangChain, Ollama, NVIDIA Agents

Mobile Development: Flutter, Dart, Android Studio

Core Programming: JavaScript / TypeScript, Java, C / C++, Problem Solving

Tools & Technologies: Git / GitHub, Linux, VS Code, IntelliJ, Mathematics

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer — Felblad (Client Project)

2026

- Independently designed, developed, and delivered Charik.tn — a complete web platform taken from architecture to production deployment for a real client.
- First professional engagement handling the full project lifecycle end-to-end, from requirements to live deployment.

Spring Boot · React · PostgreSQL · Tailwind CSS

INTERNSHIP EXPERIENCE

DevOps Intern — Beehive Enterprises

2025 – 2026

- Built and deployed a professional end-to-end DevOps pipeline in a real production environment.
- Implemented CI/CD workflows with Jenkins and GitLab CI, containerization with Docker, and infrastructure automation.
- Applied DevSecOps practices to integrate security checks throughout the delivery pipeline.

Full-Stack Developer Intern — Canadian System Technologies (CST)

Summer 2025

- Independently developed Chronovia Store, a fully functional e-commerce platform, from design to deployment.
- Built with React, Spring Boot, TypeScript, PostgreSQL, and Tailwind CSS.
- Gained hands-on experience with professional software development workflows and client delivery.

PROJECTS

AI & Intelligent Systems

CampusHub — Agentic University Web App

Agentic web app for university students; students track and justify absences via a computer-vision AI agent, with an AI assistant automating administrative tasks.

Express.js · Python / LangChain · Ollama · NVIDIA Agents · NoSQL

Live Threat Detection System

Real-time, event-driven security intelligence app for SecOps teams; monitors live server log streams and isolates infrastructure threats using a behavioral pattern-recognition agent, visualized in a live web UI.

FastAPI · Apache Spark · Apache Kafka

Web & Full-Stack Development

Charik.tn (Client Project — Felblad)

Web platform designed and built from architecture to production deployment; first project delivered for a real client.

[Spring Boot](#) · [React](#) · [PostgreSQL](#) · [Tailwind](#)

Barber Shop Booking

E-commerce web application with a barber appointment booking system and admin dashboard.

[Spring Boot](#) · [Angular](#) · [MySQL](#) · [Tailwind](#)

Chronovia Store — E-Commerce Platform

Complete e-commerce app built during the CST internship: product browsing, authentication, cart, orders, and admin dashboard.

[React](#) · [Spring Boot](#) · [TypeScript](#) · [PostgreSQL](#) · [Tailwind](#)

SocialSphere

LinkedIn-inspired platform enabling professional networking, content sharing, and career growth.

[Express.js](#) · [Tailwind CSS](#)

Mobile Development

University Mobile App — Attendance Management

Flutter-based school attendance system with role-based access for admins, teachers, and students.

[Flutter](#) · [SQL](#) · [PHP](#)

Systems & Desktop Applications

Social Media Web App

Full-stack social media application with authentication, user profiles, and real-time posting.

[Java](#) · [SceneBuilder](#)

Library Management App

GUI-based Python application for managing library books, borrowers, and due dates.

[Python](#) · [Tkinter](#)

CPU Scheduling Simulator

C application to simulate and visualize CPU process scheduling algorithms including FCFS, SJF, and Round Robin.

[C](#) · [Algorithms](#)

EDUCATION

Engineering in Computer Science — Second Year

2025 – 2026

École d'Ingénieurs

Software architecture, distributed systems, DevOps practices, and advanced algorithms, applied through hands-on projects and internship experience.

Engineering in Computer Science — First Year

2024 – 2025

École d'Ingénieurs

Advanced programming concepts, software engineering principles, and specialized computer science domains.

Integrated Preparatory Cycle

2022 – 2024

Faculté des Sciences de Bizerte

Foundation in mathematics, physics, and fundamental sciences in preparation for engineering studies.

Baccalaureate in Computer Science (Sciences Informatiques)

2021 – 2022

Lycée Khayer Eddine Ariana

Focus on programming, algorithms, mathematics, and general sciences.

CERTIFICATIONS

- Microsoft Office Specialist — Word Expert, Excel, PowerPoint (2023)
- AWS Data Engineering — Amazon Web Services (2026)
