# FEDI AFLI

## AI & Data Science Engineer

📍 Ariana, Tunisia 📞 +216 29 337 633 ✉️ f3diafli@gmail.com 🌐 fediafli.vercel.app 💻 github.com/fediafli 🔗 linkedin.com/in/fediafli

**Languages:** English (Professional) • French (Professional) • Arabic (Native)

## PROFESSIONAL PROFILE

Final-year Computer Science Engineering student specializing in AI & Data Science with proven expertise building production-grade AI-native applications, Retrieval-Augmented Generation (RAG) pipelines, and real-time streaming architectures. Experienced in orchestrating multi-agent systems (Ollama, Llama 3, Gemini, LangChain), fine-tuning vector search (ChromaDB, pgvector), and deploying containerized full-stack platforms (Docker, Kafka, Spark, Spring Boot, FastAPI, Angular). Skilled in prompt engineering and developer tooling automation.

## TECHNICAL SKILLS & EXPERTISE

**AI & Generative Systems**
RAG Architectures, Multi-Agent Workflows, LangChain, Ollama, Vector Search (ChromaDB, pgvector), Prompt Engineering, Computer Vision

**Data Engineering & Streaming**
Python, SQL, Apache Kafka, Apache Spark, ClickHouse, Debezium CDC, PostgreSQL, Pandas, Real-Time ETL Pipelines

**Full-Stack & Web Dashboards**
FastAPI, Spring Boot, Express.js, Angular, React, TypeScript, RESTful APIs, WebSockets, Tailwind CSS

**DevOps & Infrastructure**
Docker, Kubernetes, CI/CD (Jenkins, GitLab CI), Linux Admin, Git, Interactive Terminal CLI Apps (Rich/Typer)

## KEY AI & SOFTWARE ENGINEERING PROJECTS

**RAG-Powered Smart CLI Log & Diagnostic Analyzer** | **Developer AI Tooling** 2026

*Python, LangChain, ChromaDB, Ollama (Llama 3.2), Rich TUI*

- Architected a CLI log analyzer that parses server stack traces, chunks structured logs, and generates contextual vector embeddings in ChromaDB for local real-time troubleshooting.
- Engineered custom RAG prompts with localized LLM fallbacks to perform root-cause analysis and anomaly categorization without cloud latency.

**CampusHub — Agentic AI University Platform** | **Full-Stack AI System** 2026

*Ollama, NVIDIA/Llama Agents, LangChain, OpenCV, Express.js, React*

- Engineered an agentic web platform utilizing localized LLMs and computer vision agents to automate administrative justification workflows and student inquiry resolution.

**Bayan — SaaS Sales Dashboards & AI Matching Platform** | **Enterprise Product** 2026

*Python, FastAPI, Keycloak, PostgreSQL, GPU-Hosted LLM, Keycloak*

- Developed a multi-tenant dynamic schema matcher using fuzzy/semantic comparison and a type-checked LLM fallback to ingest multilingual sales exports into visual analytics dashboards.

**Real-Time CDC & Streaming Analytics Warehouse** | **Big Data Architecture** 2025

*PostgreSQL, Debezium, Apache Kafka, Spark Streaming, ClickHouse*

- Constructed an end-to-end Change Data Capture streaming pipeline capturing database commits into Kafka topics, processed with Spark Structured Streaming into ClickHouse for live dashboards.

## WORK & INTERNSHIP EXPERIENCE

**Full-Stack Web Developer — Felblad (Client Deployment: Charik.tn)** 2026

- Architected, developed, and shipped a production client web platform end-to-end using Spring Boot RESTful APIs, Angular, and Tailwind CSS. Implemented containerized cloud deployments.

**DevOps Engineering Intern — Beehive Enterprises** 2025 – 2026

- Built automated CI/CD deployment pipelines using Jenkins and GitLab CI. Configured containerization with Docker and orchestration environments on Kubernetes.

## EDUCATION & CREDENTIALS

**Engineering Degree in AI & Data Science**
Faculty of Sciences of Bizerte | 2024 – 2027 (Final Year)
Preparatory Cycle in Math & Physics (2022 – 2024)

**Certifications**

- AWS Data Engineering (2026)
- MS Word Expert & Excel (2023)
